

AIR FLUX 5000AS ANTI-VUUR AFSCHIEDER 7.5 PK 400V

€6 .695,00 (excl. VAT)

The Air Flux 5000AS anti fire separator is the newest member in our product range of hoovers. The product is characterised by a compact and efficient design, supported by the 32 filters and the powerful motor unit (5.5 KW - 7.5 HP). This unit was also equipped with a vibrating function to keep the filters clean. There are no manual steps involved; everything can be set automatically. We would like to emphasise that the 5000AS is currently one of the most powerful extraction systems on the market.

The closed housing is made of 1.2 mm thick sheet steel with an attractively applied powder coating. This closed housing provides optimum protection for the filters. The waste is collected in a removable, movable metal container. This reduces the disposal of waste to a simple and safe operation. The waste containers are equipped with an easy-to-unlock handle and a visual inspection window. The wide inlet (280 mm) makes the extractor particularly suitable for integration with systems that generate a high air flow. The mobile waste container has a capacity of more than 0.50m³. The metal waste bin makes maintenance much easier and makes your working environment more hygienic.

The extraction unit was equipped with an **anti-fire separator**. This unique system significantly reduces the risk of fire and forms a trap for larger pieces of wood waste (larger than 25 x 25). The anti-fire separator proves its worth; your working environment becomes safer!

SKU: AIR-13050

PRODUCT INFORMATION

- Mobile and silent Hoover
 - Flow rate 5000m³
- Unique anti-fire separator
- Automated vibration function for filter cleaning
 - 32 embedded polyester micron filters
- Powder-coated steel housing of 1.2 mm thickness
- 2 Mobile waste containers with visual windows (60x60x72cm dim. each)
 - Heavy metal rotor
