

BELMASH LSG-500 KINETIC LOG SPLITTER GASOLINE - 20 TON

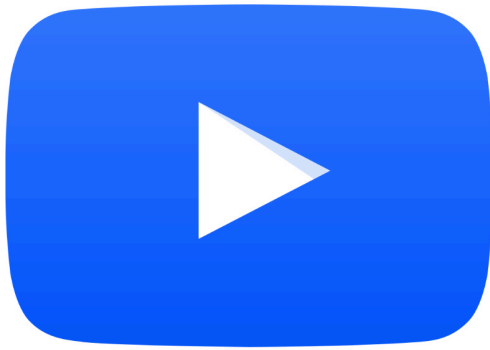

€1 .814,05 (excl. VAT)

The Kinetic Log splitter BELMASH is a unique device for the safe and super fast splitting of firewood. The ideal working height and sturdy handles combined with rubber wheels make for a wood cleaver that is easy to use and easy to move. Because it takes a lot of time to move pressure through a hydraulic system, many standard wood splitters are far too slow! The new BELMASH wood splitter is equipped with 2 flywheels and a rack and pinion system with which you transfer the power almost immediately to the pusher and the split wood. All this driven by a petrol engine (5.5 HP) and with a maximum pushing force of 20 tons. The wood cleaver cleaves logs up to 50 cm in length and up to 40 cm in diameter quickly and efficiently.

SKU: BEL-LSG500

GALERIJAFBEELDINGEN

The Kinetic Log splitter BELMASH is a unique device for the safe and super fast splitting of firewood. The ideal working height and sturdy handles combined with rubber wheels make for a wood cleaver that is easy to use and easy to move. Built in 3.5mm thick sheet steel. Because it takes a lot of time to move pressure through a hydraulic system, many standard wood splitters are far too slow! The new BELMASH wood splitter is equipped with 2 flywheels and a rack and pinion system with which you transfer the power almost immediately to the pusher and the split wood. Returning the splitting system only takes 1.5 seconds. Flywheels powered by a petrol engine (5.5 HP) collect enormous kinetic energy, giving this log splitter a pushing force of 20 tons. The wood cleaver cleaves logs up to 50 cm in length and up to 40 cm in diameter quickly and efficiently. Very easy

to operate, just lift 1 lever!

PRODUCT INFORMATION

- Kinetic splitter
- Fastest log splitter in the world
 - 1.5 seconds per cycle
 - 20 tons
 - Mobile
 - Up to 510mm length
- Gasoline engine (5.5 HP)
