

## BELMASH - PANEL CARRIER PC 3000

**€322,31 (excl. VAT)**

The BELMASH PC 3000 panel carrier is designed to facilitate work with large workpieces (plywood, laminated chipboard, MDF, etc.).

Thanks to the robust and mobile design of the panel carrier, workpieces up to a thickness of 40 mm can be easily moved to the machine or workbench. The panel carrier is equipped with swivel castors, an adjustable height and is tiltable (vertically - horizontally) by means of a convenient click system. The adjustable height of this plate carrier means that it can be used on all machines and/or work tables. By adjusting it to the right height and placing it behind a machine, it can also be used as a table-top output. The design of the panel carrier allows panels weighing up to 100 kg to be moved by one person, which significantly increases productivity and reduces costs.

**SKU:** BEL-PC3000

## GALERIJAFBEELDINGEN

The BELMASH PC 3000 panel carrier is designed to facilitate work with large workpieces (plywood, laminated chipboard, MDF, etc.).

Thanks to the robust and mobile design of the panel carrier, workpieces up to a thickness of 40 mm can be easily moved to the machine or workbench.
