BERGER BAU - CONSTRUCTION TABLE SAW 450KBS WITH CUTTING HEIGHT 130MM, 7.5HP 400V

€2 .768,60 (excl. VAT)

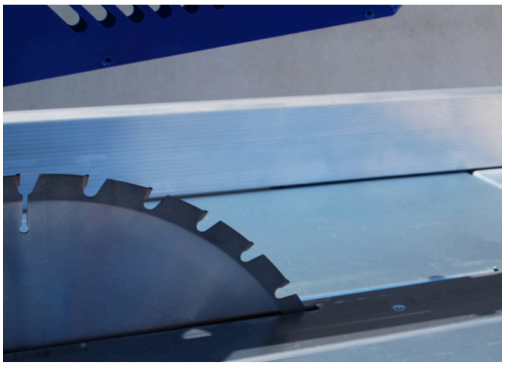

The Berger Bau 450KBS is a professional 400V construction saw with a heavy induction motor 7.5HP and a cutting depth of approx. 130mm that can withstand the toughest construction conditions. The frame is strongly hot-dip galvanized and provided with a perfectly balanced hang up by means of only 2 lifting eyes. There is no need for a 4 piece hanger. The completely closed bottom frame is equipped with a large outlet for dust extraction. The insert plate along the saw blade is made of aluminum ground material (not PVC). The robust rip fence has a quick clamping device and therefore does not have to be blocked by means of a screw. This does not damage the material. The miter gauge also features a quick clamping device and fixed adjustment points with a clear view. The machine is equipped with a phase changeover switch according to the new EUR standards. The safety switch prevents the machine from starting again after a power failure and protects the motor against overload.

SKU: BB-450KBS-A

PRODUCT INFORMATION

- Robust safety guard with connection for dust collector
- Fully enclosed lower frame with connection for dust collecor
- Aluminum insert plate
- Fixed Point Miter Gauge with Quick Clamp

- Rip fence with precision size indication and quick clamp
- High-quality German-made low-noise carbide saw blade (nail-proof)
- Strong, magnetically braked motor Moll Austria 7.5 HP
- Perfectly balanced hang up by means of 2 lifting eyes
- Strong hot-dip galvanized frame
- Phase changeover switch
- Foldable table extension
- Cutting depth Approx.130mm

DESCRIPTION

ADDITIONAL INFORMATION

Weight	125 kg
Motor	7.5 HP
Voltage	3 x 400V
Working height	850mm

Cutting depth 90 °	130 mm
Worktable	1046 x 750 mm
Bore hole	30 mm
Diameter sawblade	450mm
Saw blade speed	2850
Dust collection port	50 mm, 90 mm
