

BOW B123 EVA BLOCKS (3 PIECES)

€17,65 (excl. VAT)

Made from Bow Products' exclusive EVA material blend, Bow Products' handy 123 blocks are a valuable addition to any workshop. The unique EVA material is extremely strong and durable, and the blocks are finished in the recognisable BOW green colour, so you can always find them easily.

Unlike harder materials such as wood, EVA is easy to cut and leaves barely noticeable marks when using a saw or drill. Moreover, EVA does not stick to hot plotters.

The EVA blocks retain their shape and rigidity over time and with repeated use. As EVA is a closed-cell technology, it will not release material to other surfaces or cutters. So you don't have to worry about any damage to materials or finished surfaces.

These versatile blocks are excellent for numerous applications. Moreover, they are available in three different block sizes, so you can choose based on the depth or height requirements of your projects.
