

### BOW FEATHERPRO FP1 FEATHERBOARD

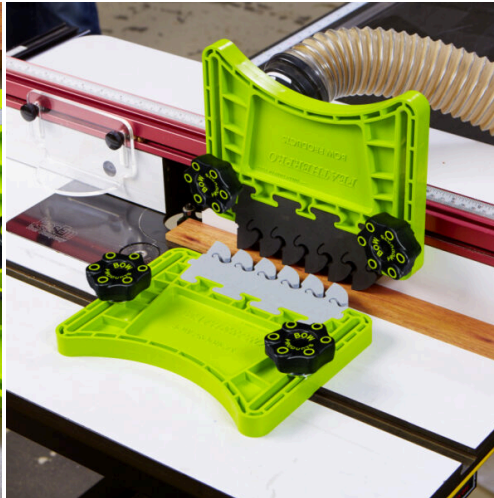

**€31,79 (excl. VAT)**

The BOW FeatherPRO featherboard features an innovative use of high-density EVA Foam / foam combs and clamping system that increase control of insertion, dramatically improve recoil and protects your wood better from damage. This compared to the general plastic featherboards. EVA is a high density, closed cell material with long life that you don't have with the common plastic featherboards. Ideal for table saws, routers, guides

**SKU:** PIH-63100

## GALERIJAFBEELDINGEN

The BOW FeatherPRO featherboard features an innovative use of high-density EVA Foam / foam combs and clamping system that increase control of insertion, dramatically improve recoil and protect your wood better from damage. This compared to the general plastic featherboards. EVA is a high density, closed cell material with long life that you don't have with the common plastic featherboards. Ideal for table saws, routers, guides

## PRODUCT INFORMATION

- **UNMATCHED SAFETY:** Patented hinge spring design absorbs recoil and provides 5X greater resistance to

recoil compared to plastic or wooden springs.

- **REVOLUTIONARY FEED CONTROL:** Thicker EVA springs increase the amount of surface contact with the workpiece, ensuring smoother glide and superior feed control.
- **VIBRATION DAMPING:** EVA springs absorb vibration and minimize vibration for a cleaner cut. Feathers are not disfiguring. EVA Feathers are not harmful to carbide saw blades or cutters in case of accidental contact.
- **VERSATILE:** Springs are reversible, replaceable and interchangeable. Try our UltraFLEX Feather for more feedback on sensitivity.
