

BOW GUIDEPRO GP5

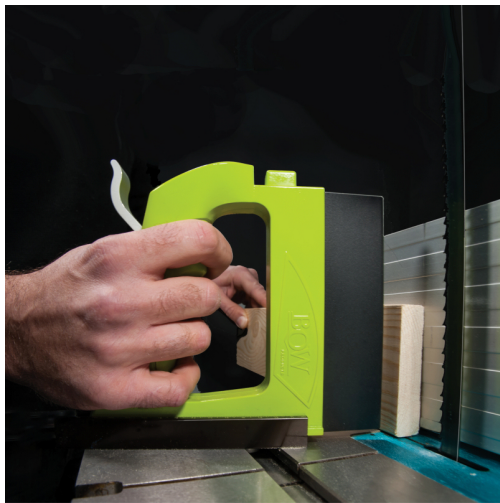

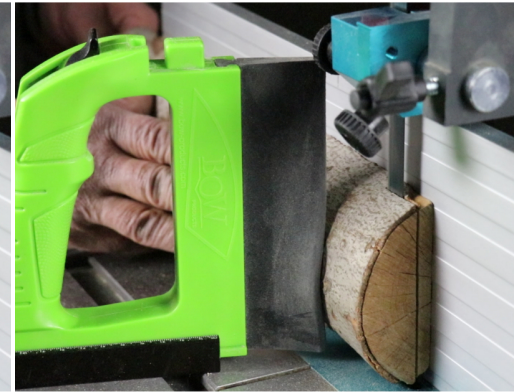

€83,75 (excl. VAT)

The GuidePRO features a silicone spring that applies a constant pressure along the vertical edge of the workpiece to ensure even contact between the workpiece and the guide, giving the best possible cut. The silicone spring flexes to accommodate variations in material shape and dampen vibrations. The spring is also easy to replace if damaged.

SKU: PIH-63104

GALERIJAFBEELDINGEN

The GuidePRO is an easy to install guide that serves as an aid to sawing. Finally a groundbreaking innovation that makes it easy and safer to cut quality and precision on a band saw or milling machine. Three easy steps for an accurate and fast installation, time after time. Miter Cam slides into the miter slot and easily swings into place for attachment.

There is no other tool like this!
