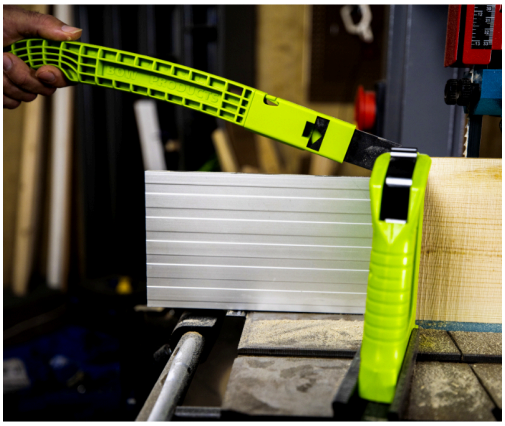
BOW PUSHPRO PUSH STICK

€22,99 (excl. VAT)

BOW push stick made of PA, high density EVA foam grip: reversible and replaceable.

SKU: PIH-63107

GALERIJAFBEELDINGEN



The PushPRO Push stick offers an unprecedented safety improvement and innovative new advantages in a tool category that has hardly seen any innovations for years.
With the High Density EVA tips, the PushPRO improves feed control, protects the wood and protects you and your tools in case of accidental contact between the push stick and the saw blade.
The PushPRO prevents the use of plastic to guide the wood. When pressure is applied, plastic can affect the porosity of some woods.
Plastic does not absorb vibrations due to the high-density foam used in the PushPRO. PushPRO provides a better cut than a plastic push stick.

PRODUCT INFORMATION

- Strong PA body
- EVA foam tip; reversible and replaceable
- Better input control
- Protects both user and tools

DESCRIPTION

The PushPRO Push stick offers an unprecedented safety improvement and innovative new advantages in a tool category that has hardly seen any innovations for years. With the High Density EVA tips, the PushPRO improves feed control, protects the wood and protects you and your tools in case of accidental contact between the push stick and the saw blade. The PushPRO prevents the use of plastic to guide the wood. When pressure is applied, plastic can affect the porosity of some woods. Plastic does not absorb vibrations due to the high-density foam used in the PushPRO. PushPRO provides a better cut than a plastic push stick.
