

BRENNHOLZ ONE CUT SPRINT 230V**€1 .036,36 (excl. VAT)**

The BrennHolz wood chipper Sprint (230V), unique in its price class. Thanks to the composition of the rotating blade and the two fixed blades, there is less back pressure, which drastically reduces the stress on the engine. This makes Sprint even more effective and faster. The Sprint has a dual use utility; on the one hand, it chops up all your garden waste (branches, leaves) into small pieces, and on the other hand, it proves its brute force by processing large branches and bushes without prior preparation and cleaning of these branches. It was equipped with two large knives and eight so-called hammers (ten knives in total). The large blades cut your waste into small particles, and the hammers in turn ensure that this waste is further processed into compost. De grote capaciteit maakt het ook mogelijk om veel materiaal tegelijk te malen. The cutting diameter is 40 mm. It was equipped with a 3 HP motor, fully electric. It was designed and built in Italy. Sprint meets all the necessary CE safety standards, an excellent record for speed and reliability.
