

BRENNHOLZ TT700WKS CARDAN DRIVE

€2 .809,09 (excl. VAT)

Robust, all-steel tilting log saw for quick, easy and safe cutting of firewood. This tilting log saw for firewood is fully compliant with the CEN safety standards for this type of machinery. The cover prevents you from getting near the saw blade while working, greatly reducing the risk of accidents. This tilting log saw is equipped with a saw blade in German chrome with diameter Ø700mm. This model is equipped with a three-point hitch and connection for PTO shaft. The machine can thus be powered by a tractor. Direct drive on the saw blade with safety clutch. Extremely suitable for cutting branches or tree trunks with a maximum thickness of 240mm. Ergonomic and easy to operate, with automatic return unit. Experience all the advantages of solid Austrian quality.

Fully assembled on delivery and ready to use.

GALERIJAFBEELDINGEN

Robust, all-steel tilting log saw for quick, easy and safe cutting of firewood. This tilting log saw for firewood is fully compliant with the CEN safety standards for this type of machinery. Includes zero voltage protection on the switch for improved safety in the event of voltage loss. Brennholz has been synonymous with reliability and safety for years. Experience all the advantages of solid Austrian quality thanks to this firewood saw. The cover prevents you from getting near the saw blade while working, greatly reducing the risk of accidents. This tilting log saw is equipped with a saw blade in German chrome with diameter Ø700mm. This model is equipped with a three-point hitch and connection for PTO shaft. The machine can thus be powered by a tractor. Direct drive on

the saw blade with safety clutch. Extremely suitable for cutting branches or tree trunks with a maximum thickness of 240mm.

The tilting saw is equipped with an automatic return unit using a spring. The saw blade is effortless to operate and cuts quickly through the wood. Saw large quantities of wood in one go without any problems and ergonomically. The handle for operating the saw is adjustable in height. An extension support is available as an option for sawing larger pieces. With the help of the yardstick you can then cut to the same size again and again. Equipped with a sturdy base with two wheels and a pull rod which makes it easy to move the machine. Easy to move, both indoors and outdoors and on uneven surfaces. Couple this tilting log saw to your tractor to be able to use it directly anywhere. Fully assembled on delivery and ready to use.
