

CARPENTRY PLANER BEAM PLANER 300RH

€1 .900,00 (excl. VAT)

The carpentry planer Beam Planer 300RH is fully made of aluminum and perfect for working with both dry and humid wood.

SKU: OBM300RH

GALERIJAFBEELDINGEN

The Beam Planer 300RH is fully made of aluminum. Therefore it is light and handy, at the same time being perfect for heavy duty works.

The powerful motor, the sharp front edge and the front shavings exhaust make the machine perfectly operable while working with both dry and humid wood without clamping the slot due to the large amount of shavings.

This allows for the planing of long beams in one go.

An adapter can be installed for lateral waste exhaust.

The planer can easily be adjusted by means of a lever, which allows for it to stay smooth and precise, even after long use.

The 300RH is the perfect partner for every carpenter on a construction site.

PRODUCT INFORMATION

- Aluminum construction
- Powerful 2150 W motor
 - Very high rpm
- Planing width 300 mm
- Perfect for working with both dry and humid wood
- Extraction of shavings through the large exhaust at the front, allowing for the planing of long beams in one go
- Planing depth (0 - 4 mm) can easily be adjusted by means of an eccentric lever
