Saw blade with 20 teeth

Conical scoring saw blade suited for cutting of double sided veneer, laminated boards, MDF and particle board

To be used on panel sizing machines that allow the vertical adjustment of the scorer in relation to the panel sizing saw blade. Make sure to use the right amount of teeth to achieve optimal results of your project. A low number of teeth is suited for fast-paced and rough sawing. A high number of teeth calls for a lower operating speed but guarantees a clean cut.

PRODUCT INFORMATION

- KON/FZ conical teeth
- For MDF and particle board
- For double sided veneer and laminated boards
- HW scoring saw blade

DESCRIPTION
