GALERIJAFBEELDINGEN

The central bit must have right hand rotation, the lateral bits have left hand rotation

We offer the DIY enthusiast a system that he can use in conjunction with his column drill or hand drill.

The new Drill-Matic system from Tendotools allows you to quickly and precisely drill all cabinet hinges of the Blum, Hettich, Salice, Mepla, Grass, Hafele, Mini and Maxi brands.

What's important in this system is that the hinge drill (in the middle) is right-turning and the outer drills are left-turning.

The drill bits have to be ordered separately and are available in different diameters (3, 5 and 8 mm for the left-turning drills, 26, 35 and 40 mm for the right-turning drills).

Specific adapters are also available for window hinges, window cranks, and line boring.

PRODUCT INFORMATION

- To be combined with column drill or hand drill
- Suitable for all cabinet hinges of the Blum, Hettich, Salice, Mepla, Grass, Hafele, Mini and Maxi brands
 - Drill bits to be ordered separately
- Adapters are also available for window hinges, window cranks, and line boring
