

DUROTEC FLEECE BRUSH DURO-GRIND

€20,66 (excl. VAT)

Thanks to the grain distribution in the fleece, the DuroGrind offers a longer service life. The constant grit ensures an even sanding pattern. Equipped with elastic nylon fleece with granules, it is ideal for shadow-free matting, satinising and polishing of stainless steel and non-ferrous metals. It removes staining after welding stainless steel, light deburring and light oxidation. In addition, it can be used on wood to smooth surfaces. With a maximum speed of 5,600 /min and a recommended speed of 2,900 /min, it is suitable for both wet and dry use

Available in different grain sizes.
