DUROtec

This abrasive sleeve is a versatile choice suitable for all metals as well as stainless steels. It is ideal for removing scratches and sanding weld seams. To use the sanding sleeves on the Durotec brush machine, the sanding sleeves should be used in combination with the DUROMASTER expansion roller.

With a maximum working speed of 30 m/s and a recommended speed of 20 m/s, you can work efficiently without compromising on quality. Moreover, the sanding belt is available in different grit sizes, so you can choose the one that best suits your specific sanding needs. This versatile sanding belt allows you to achieve professional results on a variety of materials and applications.
