

EDGE LIPPING PLANER CE53S

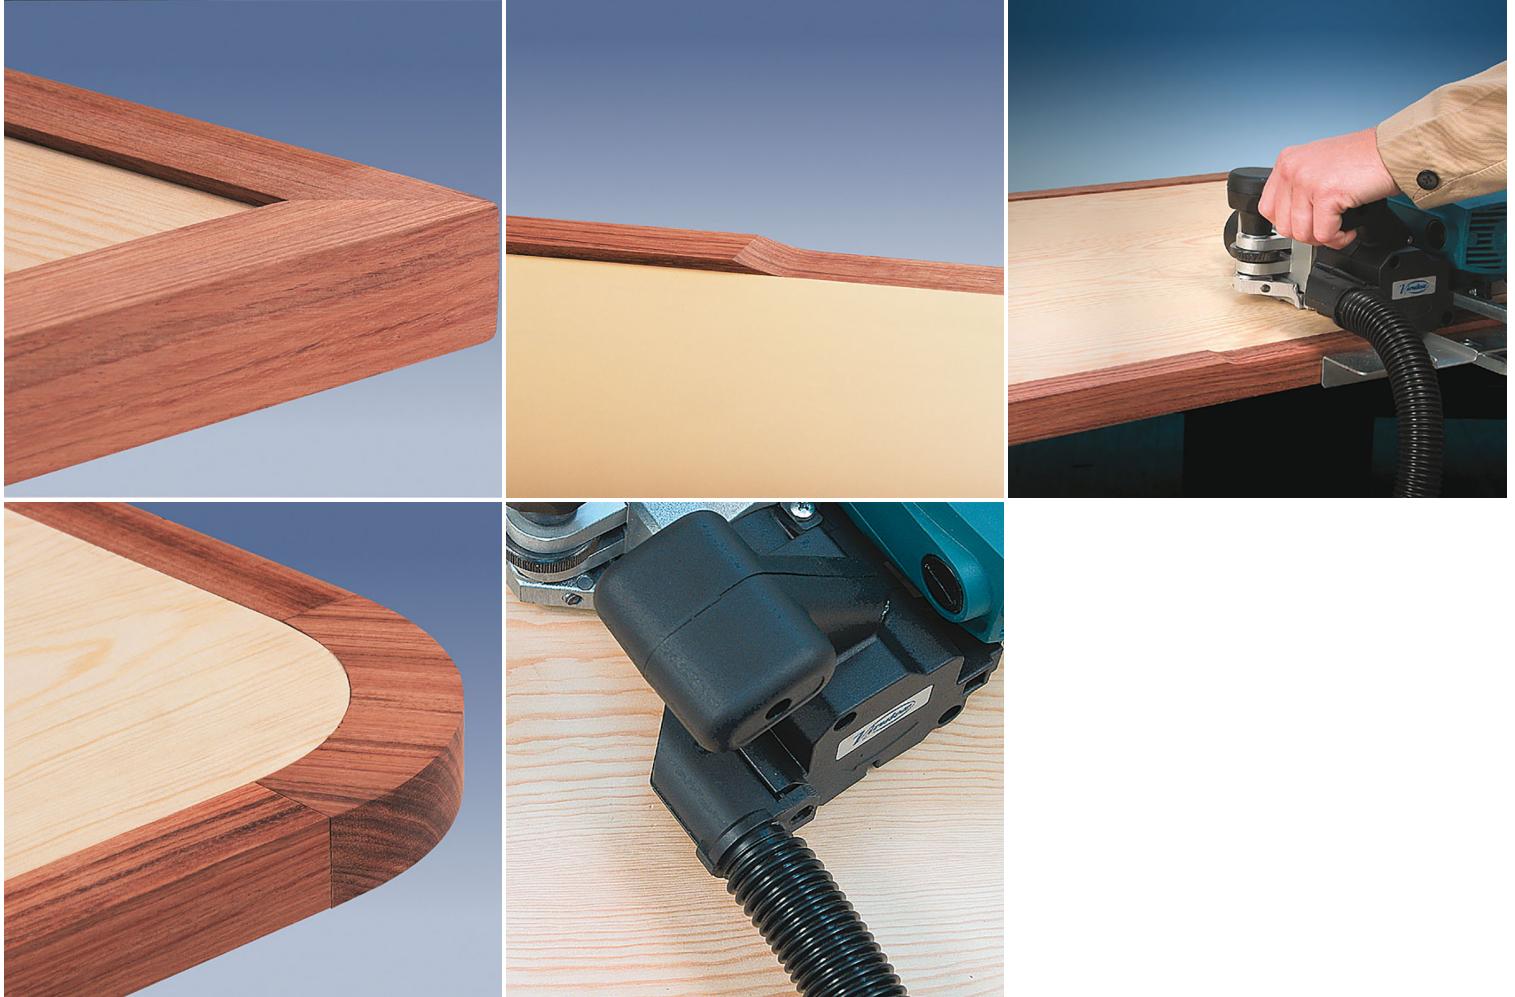

€502,04 (excl. VAT)

This edge lipping planer from Virutex has been specifically developed for finishing and flattening edges in the manufacture of furniture. Ideal for cutting edges that stand up above the middle surface, both on wooden and plastic panels. The CE53S planer is easily adjustable and works very accurately. The support base is adjustable in height in relation to the cutting edge of the milling cutter holder. The cutting edge has been specially treated to glide smoothly over your workpiece. In addition, the large cutting edge allows you to work with greater stability and safety. Due to its high power output (1300W), the machine will not lose any power even during prolonged use.

Standard delivery with a set of reversible blades in high quality carbide (widia) & connector for dust extraction.
