GALERIJAFBEELDINGEN

This Virutex electric hand planer is equipped with a perfectly balanced footplate with a length of 442 mm. It is specially designed for planing doors or other wooden pieces. In addition, this machine can also easily handle the usual applications of a professional planer. Equipped with various electronic devices for increased safety and comfort while working. Ergonomic design for hand- or left- handed people without distinction. Standard delivery in a handy PVC case.

The planing depth can be automatically adjusted with a scale of 0.2mm. With a single push of a button, you can change the side along which the machine ejects the shavings. Both sides of the machine are equipped with an exhaust for dust extraction. As standard, the GR120P planer is equipped with a reversible blade in high quality carbide (widia) with dimensions: 82x5.5x1.1mm. At the front, the machine has a rest shoe to avoid the blades

coming into contact with the workpiece when machine is parked, this avoiding damage to surfaces The GR120P is the only planer, along with the model CE120P, that permits lateral planning of overlaps of up to 1 mm and a maximum rabbeting height of 25 mm.
