

FILTER CARTRIDGE FOR DUST EXTRACTOR AIR FLUX AF-950WM

€161,15 (excl. VAT)

Filter cartridge with canister filter and residual bag for the Air Flux Dusty AF-950WM. The canister filter extracts dust down to a size of 1 micron, compared to 30 microns for the standard filter bag and 5 microns for the improved fiber filter bag. This filter is self-cleaning thanks to the convenient lever on top of the cartridge. Simply turn the lever to remove dust from the pleats in the filter, which then drops to the bottom into the included PVC residual bag.

This filter cartridge can also be used to upgrade your Air Flux AF-950 to a dust extraction rate of up to 1 micron.

SKU: 3DUCF370WM
