SALES

This trimmer is a time-saving solution for milling both the top and bottom of straight and round edges, without having to turn your panel over. This machine is suitable for panels from 10 to 44 mm thick and for profiling edges in PVC, wood or other materials.

SKU: 0FT740

GALERIJAFBEELDINGEN

This trimmer is a time-saving solution for milling both the top and bottom of straight and round edges, without having to turn your panel over.

This machine is suitable for panels from 10 to 44 mm thick and for profiling edges in PVC, wood or other materials.

It has a powerful 740 W motor equipped with an electronic speed control. Using the automatic brake on the ball bearing, you avoid damaging edges or panels. The trim plate makes it possible to mill or trim all the edges of a panel in one continuous pass.

The trimming head has a large support surface for perfect stability on flat surfaces. The extra handle provides a better grip and increased comfort while working. This cutter head is also an indispensable accessory for milling corners. Using the supplied pen, you can easily create a support to place the machine horizontally. Thanks to this lever, you can mill vertically without any problems to also finish your corners nicely.

A unique feature of this trimmer is that you can mill both the top and bottom without having to turn your panel over. You select the cutting tool at the top or bottom by moving the position lever.

PRODUCT INFORMATION

- Milling top and bottom without having to turn your panel over.
 - 740 W motor
 - Soft grip
- With the position control, you select the top or bottom cutting tool
 - Suitable for panels with a thickness of 10 to 44 mm
