

GRÖBE SPLITTER TT16E-PTO CARDAN-DRIVE/400V - 16 TONS

€2 .603,30 (excl. VAT)

Standing wood cleaver for two-hand operation. This powerful wood splitter is perfect for semi-professional or home use with a power of 16 tons. With the help of this machine you can easily split wood pieces up to 1000mm in length and 500mm in diameter. This model can be driven in two ways. On the one hand, the log splitter is equipped with a three-point hitch and connection for cardan shaft. The machine can thus be powered by a tractor. On the other hand, this splitting machine also has an induction motor of 7 HP. Both driven by the motor and by the cardan gear, this splitter delivers a force of 16 tons!

Equipped with sturdy wheels with steel rims. In combination with the impact-resistant rubber tyres, this splitting machine distinguishes itself from the competition. Easy to move on different surfaces. Experience the necessary comfort when moving the machine outside in the garden or on difficult surfaces.

SKU: 0GK16EPTO

GALERIJAFBEELDINGEN

Standing wood cleaver for two-hand operation. This powerful wood cleaver is perfect for semi-professional or home use. With the help of this splitting machine you can easily split wood pieces up to 1000mm in length and 500mm in diameter. The table can be adjusted to two heights: 520mm or 1050mm. This model can be driven in two ways. On the one hand, the log splitter is equipped with a three-point hitch and connection for cardan shaft. The machine can thus be powered by a tractor. On the other hand, this splitting machine also has an induction motor of 7 HP. Both driven by the motor and by the cardan gear, this splitter delivers a force of 16 tons! This makes the cleaver suitable for splitting several types of wood. Includes zero voltage protection on the switch for improved safety in the event of voltage loss.

The cleaver pushes all the way down to the bottom, which makes splitting wood with large diameters easier. An extra, very important advantage is that this wood splitting machine can process pieces up to 1m in length. So save time by doubling your splitting capacity. For the heaviest and longest pieces, the machine is equipped with strong support arms and lifting chains.

X2 Series

The machines in the Gröbe X2 series are standard equipped with sturdy wheels with steel rims. In combination with the impact-resistant rubber tyres, this makes the Gröbe X2 Series products stand out from the competition. Easy to move on different surfaces. Experience the necessary comfort when moving the machine

outside in the garden or on difficult surfaces.
