GROOVING SAW BLADE Ø180MM V-SHAPE TEETH THICKNESS 6MM

€149,55 (excl. VAT)

The teeth of this saw blade were grinded into a V-shape (45°) in order to easily make grooves on your boarding panels. On demand the teeth can be filed down under different angles/into different shapes or with different thickness.

Grooving saw blade with flat (FZ) tungsten teeth to be used for cutting grooves in hardwood, softwood, timber wood, and plastic coated panel. The sawing blades have a bore of 30mm and are ideally suited for use on all spindle moulding machines or sawing tables.
