

GUIDE RAIL UCP90

€257,25 (excl. VAT)

Using the UCP90 rail (length=1400mm) you cut with perfect stability and precision. The rail is compatible with all models of Virutex circular saws, jigsaws or routers. Conveniently create perfectly straight cuts, grooves, mouldings, etc... Standard delivery with two systems (suction cups or clamps) to attach the rail to the workpiece. The two suction cups have a high fixing force and are ideal for use on all smooth, non-porous surfaces. For other surfaces, you can use the clamps to secure the rail to the workpiece via the lower guide, even if the rail protrudes over the panel. Equipped with anti-scratch protection.

Attention: the routers must be placed on the rail using an attachment. This attachment is available as an option. For longer cuts, a 2400mm rail as well as a connection kit for multiple rails are available.
