

HAND GLUER WITH TOP ROLLER

€163,30 - €218,39 (excl. VAT)

Specially designed hand gluer for gluing large surfaces with vinyl (white) adhesives. Available in two models with different roll widths and glue container capacities. Model EM26D is equipped with a roll with a width of 122mm and a capacity of 1kg. The larger model EM126D has a roll with a width of 180mm and a capacity of 1.4kg. The machine is equipped with a trigger on the handle for easy opening and closing of the glue container. At the top there is a second roller (width 92mm) for stationary glueing along the top with the machine.

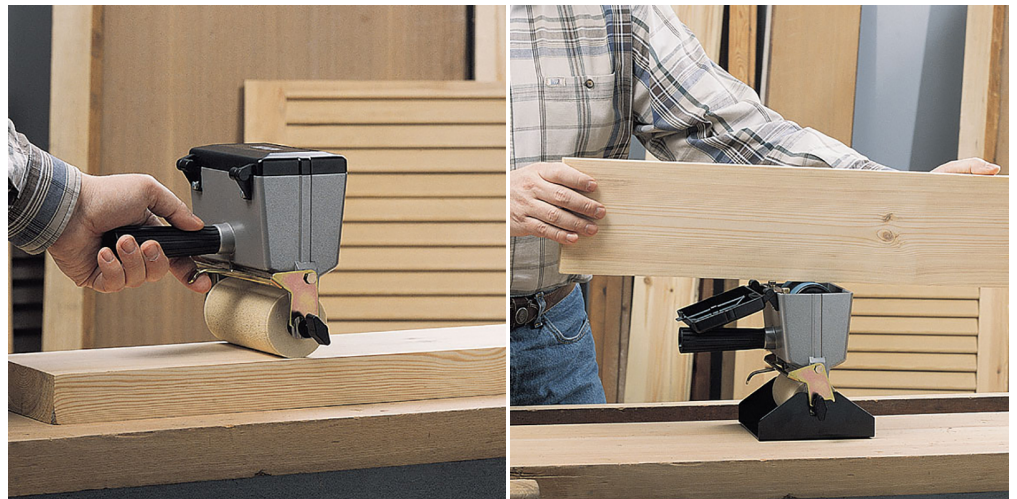

Attention: this hand gluer comes standard with a rubber roller, suitable for vinyl (white) adhesives and water-based adhesives. For synthetic adhesives an optional PU roll is available (Ref. 2504065). This hand gluer is also available without roller at the top (models EM26D and EM126T).

GALERIJAFBEELDINGEN

Specially designed hand gluer for gluing large surfaces with vinyl (white) adhesives. Available in two models with different roll widths and glue container capacities. Model EM25D is equipped with a roll with a width of 122mm and a capacity of 1kg. The larger model EM125T has a roll with a width of 180mm and a capacity of 1.4kg. The machine is equipped with a trigger on the handle for easy opening and closing of the glue container. Simply press the trigger to run the glue over the roll. Using this trigger you will always obtain the right amount of glue for your project. Thanks to the support, the hand gluer can easily be put away. For cleaning, you can keep this adhesive under water without risk of damage. At the top there is a second roller (width 92mm) for stationary glueing along the top with the machine.

Attention: this adhesive comes standard with a rubber roller, suitable for vinyl adhesives and water-based adhesives. For synthetic adhesives an optional PU roll is available (Ref. 2504065). This hand gluer is also available without roller at the top (models EM26D and EM126T).
