

HAND GLUER WITHOUT TOP ROLLER

€138,12 - €198,04 (excl. VAT)

Specially designed hand gluer for gluing large surfaces with vinyl (white) adhesives. Available in two models with different roll widths and glue container capacities. Model EM26D is equipped with a roll with a width of 122mm and a capacity of 1kg. The larger model EM126D has a roll with a width of 180mm and a capacity of 1.4kg. The machine is equipped with a trigger on the handle for easy opening and closing of the glue container.

Attention: this hand gluer comes standard with a rubber roller, suitable for vinyl (white) adhesives and water-based adhesives. For synthetic adhesives an optional PU roll is available (Ref. 2504065). This hand gluer is also available with an additional adhesive roller at the top for stationary gluing of workpieces from above (models EM25D and EM125T).
