

HARVEY FALCON SERIES HW303ES - 230V

€3 .388,51 (excl. VAT)

The Harvey Falcon series are high performance spindle moulders, specifically designed for industrial milling applications. Designed with both functionality and comfort in mind, this machine has every possible function for a spindle moulder in this class. Equipped with an extra heavy-duty chassis, a solid aluminium protective cover with safety guides and fine adjustment. The powerful 230V motor delivers 3HP and ensures that this table can handle almost any milling task. The Harvey Falcon HW303 has a spindle of 30mm. With the optionally available adapter and collets, the machine can also be used for profiling with router bits. The large cast iron table guarantees the necessary stability during work. Can be used at four speeds, with centralised control panel above the machine.

The HW303ES is equipped with a sliding system with table and mitre guide.

SKU: HAR-HW303ES

PRODUCT INFORMATION

- spindle moulder 30mm
 - Sliding system
 - Four speeds
- Universal milling
- Central control panel

- Cast iron work table
 - Robust design
 - Heavy duty chassis
- Option: adapter for router bits (profiling)

DESCRIPTION

The Harvey Falcon series are high performance spindle moulders, specifically designed for industrial milling applications. Designed with both functionality and comfort in mind, this machine has every possible function for a spindle moulder in this class. Equipped with an extra heavy-duty chassis, a solid aluminium protective cover with safety guides and fine adjustment. ADDITIONAL INFORMATION

Weight	260 kg
Motor	3 HP
Voltage	230 V
Shaft diameter	30 mm
No-load speed	1400rpm, 3000rpm, 7000rpm, 9000rpm
Table opening	38mm, 70mm, 100mm, 140mm
Height of groove	100mm
Worktable	558x725mm
Fence	423x127mm

Dust collection port	100 mm
Working height	860mm
Chassis	590x530mm
Sliding table system	1220x230mm
Miter guide	-50° - +50°
