

KREG ACCU-CUT XL

€197,99 (excl. VAT)

Turn your circular saw into a cutting tool with rail guide to cut complete plywood panels like a pro. Guarantee the success of all your projects by cutting straight, accurately and splinter-free with the Accu-Cut™ XL guide for circular saws. Planing and cutting up to 2540 mm in plywood, MDF and other large panels, precisely and in a controlled way. The Accu-Cut™ XL guides the circular saw along an extra-long aluminium rail that stops the saw and produces straight cuts. The rail guide is very easy to use: mount your saw on the universal carriage, align the Accu Cut™ XL along the cutting line and make the outstanding cuts you dream of. The anti-slip strip prevents the wood from splintering or tearing off along the entire cutting line. The same strips have an anti-slip surface that keeps the rail in place even without clamps.

SKU: KRE-KMA3700
