

KREG CABINET HARDWARE JIG

€35,99 (excl. VAT)

Whether you are fitting a new handle or dozens of drawer knobs, with the drilling template for cabinet hardware you no longer have to guess and work accurately and consistently every time. Thanks to the adjustable edge guide and the built-in measuring tape (with English and metric markings), it is easy to place knobs very precisely. In addition, the cabinet hardware jig has moveable and clickable drilling guides made of hardened steel that correspond to the most common distances between the holes for cabinet knobs and handles. The guides make it easy to drill straight, precisely positioned holes. The drilling jig is suitable for just about any type of button or handle, making it particularly versatile.

SKU: KRE-KHI-PULL

GALERIJAFBEELDINGEN

Whether you are fitting a new handle or dozens of drawer knobs, with the drilling template for cabinet hardware you no longer have to guess and work accurately and consistently every time. Thanks to the adjustable edge guide and built-in rulers (with English and metric markings), it is easy to place knobs very precisely.
