

KREG COMPACT ROUTER TABLE

€392,69 (excl. VAT)

The compact router table offers the same features as a full-fledged industrial router table, but in a portable format. The worktop is made of vibration- and sound-absorbing MDF with edge trim and has an Easy-Slide™ surface. The outer surface is made of laminate with a modified texture, so that the workpieces glide smoothly over the table. The router table insert measures 235 x 298 x 9.5 mm and can therefore accommodate even the largest routers. The guide rail also has separate sliding plates to provide additional support for the workpiece at the bit and to enable the table to be used as a vertical planer.

SKU: KRE-PRS2100

GALERIJAFBEELDINGEN

The compact router table offers the same features as a full-fledged industrial router table, but in a portable format. The worktop is made of vibration- and sound-absorbing MDF with edge trim and has an Easy-Slide™ surface. The outer surface is made of laminate with a modified texture, so that the workpieces glide smoothly over the table. The router table insert measures 235 x 298 x 9.5 mm and can therefore accommodate even the largest routers. Supplied with Level-Loc inserts. When you tighten these rings, they always come out nice and level with the work surface. The heavy aluminium guide rail is secured with quarter-turn levers. It allows you to adjust the guide rail quickly and secure it. They are also large enough to close and open easily, but small enough not to get in the way. The guide rail also has separate sliding plates to provide additional support for the workpiece at the bit and to enable the table to be used as a vertical planer.

PRODUCT INFORMATION

- Vibration- and sound-absorbing MDF board
- guide rail made of heavy anodised aluminium

DESCRIPTION

The compact router table offers the same features as a full-fledged industrial router table, but in a portable

format. The worktop is made of vibration- and sound-absorbing MDF with edge trim and has an Easy-Slide™ surface. The outer surface is made of laminate with a modified texture, so that the workpieces glide smoothly over the table. The router table insert measures 235 x 298 x 9.5 mm and can therefore accommodate even the largest routers. Supplied with Level-Loc inserts. When you tighten these rings, they always come out nice and level with the work surface. The heavy aluminium guide rail is secured with quarter-turn levers. It allows you to adjust the guide rail quickly and secure it. They are also large enough to close and open easily, but small enough not to get in the way. The guide rail also has separate sliding plates to provide additional support for the workpiece at the bit and to enable the table to be used as a vertical planer.
