

KREG DOCKING STATION FOR POCKET-HOLE JIG 520PRO AND 720

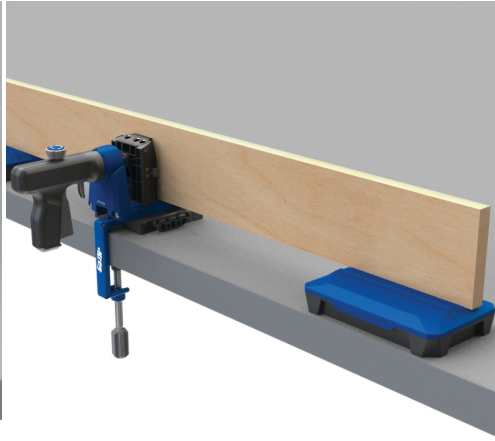

€63,99 (excl. VAT)

The Kreg® Pocket-Hole Jig 720 or 520PRO can do much more with the Docking Station. It comes with support wings, extra storage space and a jig clamp to attach the jig to a work table. Together they form the ultimate connection station for the Pocket-Hole Jig 720 or 520PRO.

SKU: KRE-KPHA750

GALERIJAFBEELDINGEN

The Kreg® Pocket-Hole Jig 720 or 520PRO can do much more with the Docking Station. It comes with support wings, extra storage space and a jig clamp to attach the jig to a work table. Together they form the ultimate connection station for the Pocket-Hole Jig 720 or 520PRO.

With the supplied material stop you make repetitive work even easier. You simply slide the stop onto the side piece of the Docking Station and this creates extra stability for your workpiece. The material stopper can be stored in the Docking Station after use.

The included steel Pocket-Hole Jig clamp is ideal for clamping your connection system to your work surface. This makes it a complete and professional connection system for your workbench. The clamp can also be easily stored in the Docking Station after use.

PRODUCT INFORMATION

- Insert the Pocket-hole jig into the base and you have a high quality connecting station on your workbench
 - Better support for long workpieces thanks to moveable support wings
 - There is additional storage space for bits, screws, etc. in the support wings.
- With the adjustable stopper, you can quickly drill identical pocket holes in different places
 - Supplied with a clamp to fix the jig to a work surface
 - Suitable for the Pocket-Hole Jig 720 and 520PRO
 - The support wings are foldable
