

KREG DOWEL DRILLING JIG FOR POCKET-HOLE JIG 720 AND 720PRO

€87,99 (excl. VAT)

The Kreg Pocket-Hole Jig 720 and the Kreg Pocket-Hole Jig 720 Pro are compatible with the Kreg KPHA740 dowel drilling jig. With this dowel drill, you can drill your own dowels to suit your project.

In this way, you can ensure that the type of wood, the colour of the wood and the direction of the fibres all match your workpiece. In no time at all, you will be making wood joints that are no longer noticeable!

SKU: KRE-KPHA740

GALERIJAFBEELDINGEN

The Kreg Pocket-Hole Jig 720 and the Kreg Pocket-Hole Jig 720 Pro are compatible with the Kreg KPHA740 dowel drilling jig. With this dowel drill, you can drill your own dowels to suit your project.

It is easy to operate the dowel drilling jig. Simply place the dowel drilling jig in position after removing the original drilling jig from the 720 Jig. Then simply place your (remaining) material in the jig and lower the lever. You are ready to drill your own dowels once you have screwed the drill stop to the dowel drill with the Allen key.

You can quickly make dowels from the remaining wood in your project using the Kreg dowel jig. In this way, you can ensure that the type of wood, the colour of the wood and the direction of the fibres all match your workpiece. In no time at all, you will be making wood joints that are no longer noticeable! This Kreg dowel drilling jig produces dowels with the same dimensions as the pocket holes of the Pocket-Hole Jig 720 and 720 Pro. After drilling, the dowels are easy to saw off by hand or with a band saw, for example.

PRODUCT INFORMATION

- Make your own dowels from leftover wood
- Fits Pocket-Hole jig 720 and 720PRO
