

KREG HINGE DRILL 35 MM

€21,99 (excl. VAT)

With the 35 mm hinge drill, you can drill clean, perfect holes for concealed hinges. The drill bit is a direct replacement for the drill bit that comes with the Kreg Concealed Hinge Jig.

For clean and fast cutting, the drill bit has four carbide cutters - two main cutters that drill a hole with a flat bottom, and a pair of spur cutters that provide clean edges free of tearout. The drill's shank is the right size to fit into the drill guide of the Concealed Hinge Jig, and it has a shoulder that positions the stop collar perfectly.

SKU: KRE-KHI-BIT

Bore clean, perfect holes for concealed door hinges

With the 35 mm hinge drill, you can drill clean, perfect holes for concealed hinges. The drill bit is a direct replacement for the drill bit that comes with the Kreg Concealed Hinge Jig.

For clean and fast cutting, the drill bit has four carbide cutters - two main cutters that drill a hole with a flat bottom, and a pair of spur cutters that provide clean edges free of tearout.

The drill's shank is the right size to fit into the drill guide of the Concealed Hinge Jig, and it has a shoulder that positions the stop collar perfectly.

Please note: the stop collar is not included with this drill bit. It is sold together with the Concealed Hinge Jig.

While the Concealed Hinge Bit is designed for use with the Concealed Hinge Jig, it's a great drill bit to use with any hand drill or drill press for boring precise 35 mm holes.
