

KREG JIG FOR CABINET DOORS

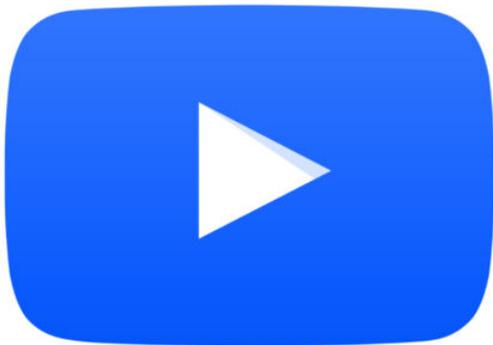

€35,99 (excl. VAT)

Handy jig, especially designed for mounting cabinet doors. Mounting cabinet doors becomes a piece of cake. Of course, it can be used for both front frames and frameless cupboards, as well as left- and right-handed doors.

The jig has a support arm that helps you hold the door with one hand, while your other hand is free to attach the hinges to the cabinet. With the cabinet door mounting jig, you can also position your cabinet doors accurately. Adjust the support arm to one of nine different positions to position your doors exactly where you want them. The mounting plate for cabinet doors comes with two micro-adjustment wedges for an ultra-fine finish.

SKU: KRE-KHI-CDIJ-INT
