

KREG MULTI-MARK ADJUSTABLE SQUARE ANGLE 150 MM

€18,99 (excl. VAT)

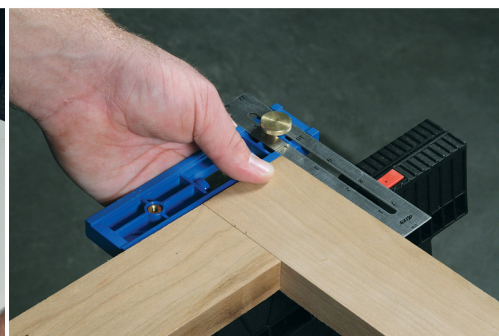

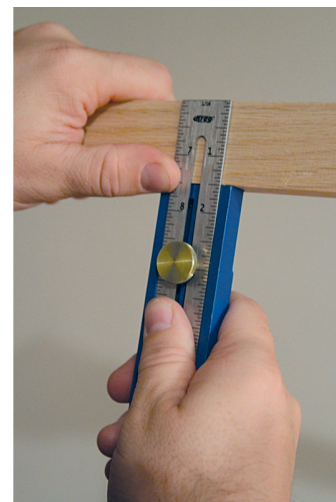

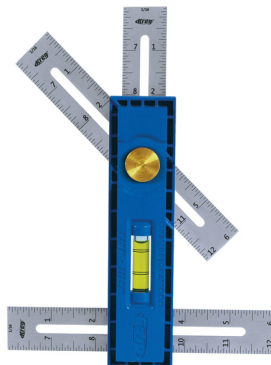

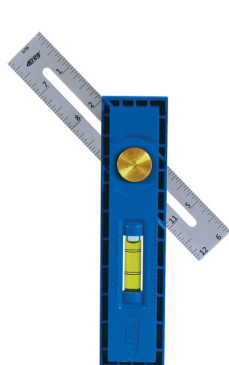

The Kreg Multi-Mark adjustable square square, also called block square, has a plastic block. This block contains a spirit level and the ruler can be slid onto the block, which is provided with a measurement on both sides: one side in millimeters, the other side in inches. The metric side has a graduation on one side that starts at 0 and runs to 152 mm, the other side starts at 152 mm and continues to 304 mm.

The Multi-Mark is a measuring tool that can be used in various ways; as spirit level, adjustable block hook, depth gauge, but also, for example, for adjusting the height of saw blades or router bits and cutterheads.

With the square you can measure and mark angles of 90°, but also set it obliquely like a double square. Handy for transferring an angle when measuring and marking.
