

## KREG POCKET-HOLE JIG XL

**€65,99 (excl. VAT)**

Make holes with twice the force with the Kreg Pocket-Hole Jig XL. This extra large mould makes it easy to build large and strong.

The Pocket-Hole Jig XL has hardened steel drill guides that position the stepped XL drill bit at the perfect angle for extra-large pocket holes. The two drill guides position a pair of pocket holes at an ideal distance from each other, but the distance can be adjusted by simply twisting the two drill guides apart to use them separately. Thanks to the GripMaxx™ material on the underside of the mould, it stays put while you drill. The jig comes with a clamp adapter to easily attach your jig with Kreg clamps, but also with many other brands.

Combined with the power of the XL Pocket-Hole screws, which are specially designed with extra grip, the Pocket-Hole Jig XL is perfect for building big.

**SKU:** KRE-KPHJ920
