

KREG PRODUCTION STOP

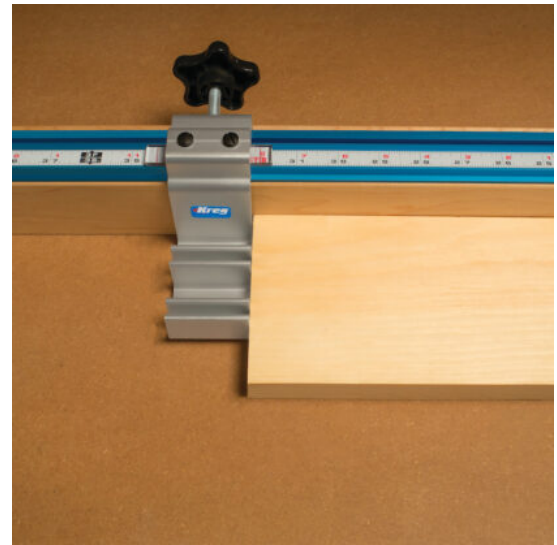

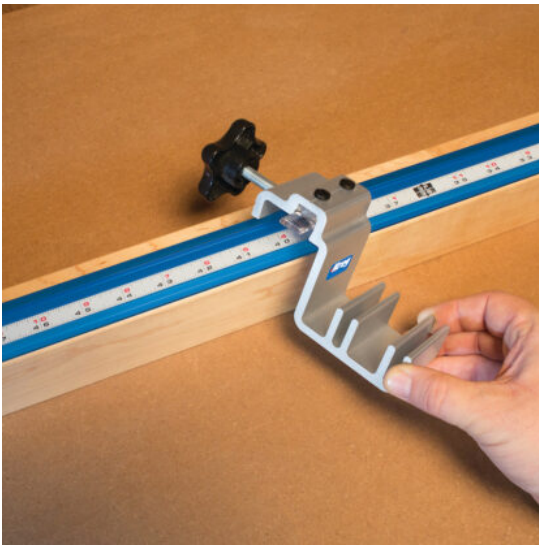

€35,99 (excl. VAT)

Resistant to repeated cutting in an industrial environment. The production stop is mounted on top of the guide rail and has a double cursor with lens so that you can use it on both sides of the blade without any problems.

The Production Stop is designed to work with Kreg® Top Trak and Heavy-Duty Trak, so you can build your own guide, install the rail and use the stop. This gives you options, and means that you can easily use the Production Stop on many types of tools. The stopper simply falls into the rail from above, making it quick to remove and reposition.

SKU: KRE-KMS7800
