

### KREG STRAIGHT EDGE GUIDE 1219 MM

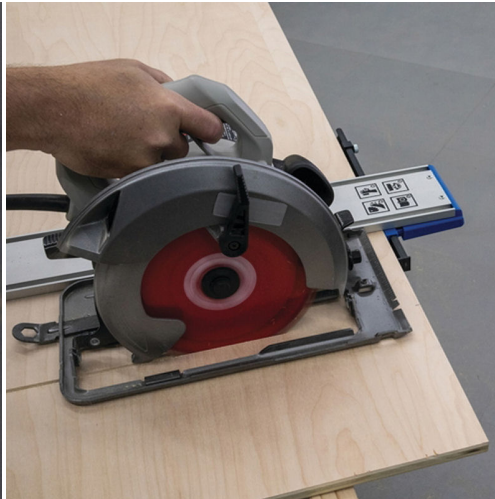

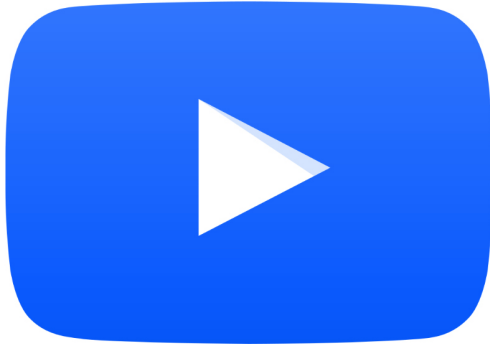

**€66,99 (excl. VAT)**

The Kreg Straight Edge Guide allows you to cleanly and accurately cut sheet material up to 1219 mm (48"). Whether you want to get started with your circular saw, jigsaw or trim router, the Kreg Straight Edge Guide will create precise and accurate results.

The Kreg Straight Edge Guide consists of two 711 mm (28") sections that you attach to each other with the connectors. On one side of the ruler, you can attach the handle. This handle allows you to easily pull the ruler backwards. You position the ruler, after which you can easily clamp it with the adjustable GripMaxx fixing clamp. This built-in clamping system ensures that the ruler is always firmly attached to your material, ensuring that you make straight cuts.

**SKU:** KRE-KMA4500

## GALERIJAFBEELDINGEN

The Kreg Straight Edge Guide allows you to cleanly and accurately cut sheet material up to 1219 mm (48"). Whether you want to get started with your circular saw, jigsaw or trim router, the Kreg Straight Edge Guide will create precise and accurate results.

The Kreg Straight Edge Guide consists of two 711 mm (28") sections that you attach to each other with the connectors. On one side of the ruler, you can attach the handle. This handle allows you to easily pull the ruler backwards. You position the ruler, after which you can easily clamp it with the adjustable GripMaxx fixing clamp. This built-in clamping system ensures that the ruler is always firmly attached to your material, ensuring

that you make straight cuts.

The two parts of the stop ruler can also be used separately. Thus, you can also process smaller sheet material with this stop ruler.

The guide comes with two guide arms ("cutline indicator arms"), which you use to adjust exactly where the saw blade will be. The 'indicator arms' are easy to slide out of the way again after setting.

The Kreg Straight Edge Guide is made of anodized aluminum and impact-resistant plastic. As a result, this stop ruler will last a long time, even with intensive use.

Do you want to cut even larger sheet material or other surfaces? Then this Kreg Straight Edge Guide can also be expanded with the optional Kreg Straight Edge Guide Extension, which extends your working capacity from 1219 mm (48") to 1828 mm (72").

## PRODUCT INFORMATION

- Stop ruler in 2 parts
- Parts can be connected with the supplied connectors
  - Adjustable fixing clamp
- Handle for pulling back the ruler
- Two guide arms for precise adjustment of saw blade position
  - Made of anodized aluminum and shock resistant plastic
- Extendable to 1828 mm with Straight Edge Guide Extension

## DESCRIPTION

The Kreg Straight Edge Guide allows you to cleanly and accurately cut sheet material up to 1219 mm (48"). Whether you want to get started with your circular saw, jigsaw or trim router, the Kreg Straight Edge Guide will create precise and accurate results. The Kreg Straight Edge Guide consists of two 711 mm (28") sections that you attach to each other with the connectors. On one side of the ruler, you can attach the handle. This handle allows you to easily pull the ruler backwards. You position the ruler, after which you can easily clamp it with the adjustable GripMaxx fixing clamp. This built-in clamping system ensures that the ruler is always firmly attached to your material, ensuring that you make straight cuts. The two parts of the stop ruler can also be used separately. Thus, you can also process smaller sheet material with this stop ruler. The guide comes with two guide arms ("cutline indicator arms"), which you use to adjust exactly where the saw blade will be.
