

LONG-REACH DRY WALL SANDER LPC97S

€878,01 (excl. VAT)

This long sander from Virutex is ideal for painters and plasterers. Thanks to its low weight, you can work quickly, efficiently and without fatigue. Because of the position of the motor halfway between the sanding head and the extra handle, this machine also remains very manoeuvrable. Equipped with electronic speed control. Quick connection for the extraction system by means of a bayonet connection. It is possible to disassemble part of the sanding disc in order to sand hard-to-reach areas.

Standard delivery includes: 4m extraction hose, Velcro to keep the power supply along the hose, auxiliary handle, sanding disc grain 80 and carrying bag. Additional sanding discs with different grit sizes are always available.

SKU: VIR-LPC97S

GALERIJAFBEELDINGEN

This long sander from Virutex is ideal for painters and plasterers. Thanks to its low weight, you can work quickly, efficiently and without fatigue. The ergonomic design and good balance facilitate sanding walls and ceilings from different angles. Because of the position of the motor halfway between the sanding head and the extra handle, this machine also remains very manoeuvrable. Equipped with electronic speed control, allowing optimum adaptation to the surface to be machined and to the grain of the abrasive used. The switch is located at the back of the machine for improved protection against dust. Quick connection for the extraction system by means of a bayonet connection. It is possible to disassemble part of the sanding disc in order to sand hard-to-reach areas.

Standard delivery includes: 4m extraction hose, Velcro to keep the power supply along the hose, auxiliary handle, sanding disc grain 80 and carrying bag. Additional sanding discs with different grit sizes are always available.
