

**OUTLET|CONCRETE SANDER 17CM**

**~~€294,00~~ Original price was:  
€294,00. €190,00 Current price is: €190,00.  
(excl. VAT)**

This concrete grinder was specially designed for grinding away concrete parts, sanding down old concrete layers or removing transitions between formwork and concrete runners. Optimal preparation for further coatings. The concrete sander has a metal housing and dust extraction. This extraction prevents dust nuisance, which in turn reduces disc wear and keeps the concrete pores open. Equipped with a diamond head grain 24 and a reliable 2100W motor. A blocking system has also been fitted so that the diamond heads can be changed safely. Vibration-damping, ergonomic handle (rotates 90°) for optimal handling and control of the device. An airflow cooling system reduces noise pollution to an absolute minimum. Max speed 6,600.

**SKU:** S-FB7

This concrete grinder was specially designed for grinding away concrete parts, sanding down old concrete layers or removing transitions between formwork and concrete runners. Optimal preparation for further coatings. The concrete sander has a metal housing and dust extraction.
