PRODUCT INFORMATION

- Strong permanent joint
- **Installation WITHOUT glue or tools**
 - Ensures huge time savings
 - For use in panels from 12 mm thick
 - Ø 8 mm, 30 mm length
 - Available per 100, 200 or 500 pieces

OVVO dowel connector is designed to be used anywhere you use standard dowels and can be used in panels from 12 mm thick, in a wide range of materials.

The patented design is designed to fit industry standard 8mm drill holes, for the most efficient processing of panels. With the OVVO dowel connector, panels can be easily pushed together, saving time and eliminating clamping, without the use of tools, screws or glue.

Available in boxes of 100, 200 and 500.
