

PANEL SAW SLIDING TT1250X

€1 .880,16 (excl. VAT)

This compact panel saw from the Hobby+ series with 230V induction motor (2HP) is a very popular machine and the ideal entry-level model. This model of panel saw has a heavy-duty cast iron worktable that provides very good flatness. The high-quality prismatic sliding system has a total cutting length of 1250 mm. The telescopic fence is equipped with a flip stop with fine adjustment. The prismatic sliding system has a T-slot for inserting a mitre guide (supplied as standard). To adjust the height and tilt of the saw blade, the machine is equipped with handwheels. The sliding system is easily removable. This way, you can easily store the machine when not in use.

Optionally available with a handy, mobile kit WK600.

GALERIJAFBEELDINGEN

This compact panel saw from the Hobby+ series is a very popular machine and the ideal entry-level model. The panel saw is equipped with a heavy-duty cast-iron worktable that offers very good flatness. In addition, an extension table is included as standard. This extension can be placed on both sides of the work table. The high-quality prismatic sliding system has a total cutting length of 1250 mm, which is the width of most large sheets. The telescopic fence is equipped with a flip stop with fine adjustment. The width guide is also easy to adjust with the help of a fine adjustment system.

The prismatic sliding system has a T-slot for inserting a mitre guide. This mitre guide also comes standard with

the machine. The saw blade is tiltable to a maximum of 45°. To adjust the height and tilt of the saw blade, the machine is equipped with handwheels. The Sliding Comfort TT1300 is equipped with a powerful, quiet 230V (2HP) induction motor with V-belt drive. The sliding system is easily removable. This way, you can easily store the machine when not in use.

Optionally available with a handy, mobile kit WK600.
