

PIHER - DOUBLE EDGE CLAMP FOR GLUE CLAMP

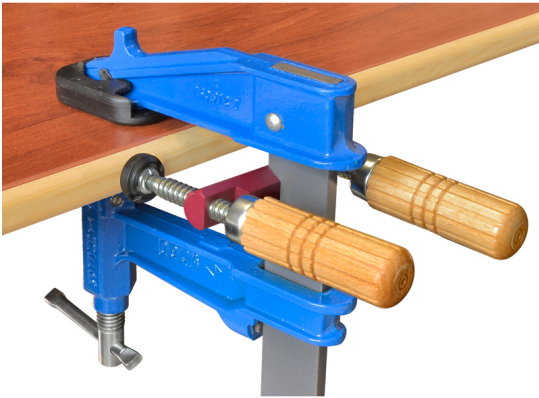

€30,32 (excl. VAT)

This double edge clamp can be used on all types of glue clamps with a thickness of maximum 10mm thickness. It is made from a steel body and has a galvanized thread. The handle is ergonomic and made of beech wood. Includes plastic protective cap. The edge clamp can be rotated out by a maximum of 50 mm and is therefore compatible with almost all types of screw clamps.
