

PLUG CUTTER Ø35MM WITH SHANK 16MM

€126,00 (excl. VAT)

Plug cutters to be used on all wood types. These straight wood plug cutters are used to make plugs to be inserted after having drilled with "Forstner" bits. Use the plugs after installing sunken screws and sand the top of the plug flush with the wood surface to create nearly invisible screw connections on your wood projects. This cutter has a length of 140mm and 4 SP cutting teeth.

SKU: KL-R220350R
