GALERIJAFBEELDINGEN

The PROFI Drill-Matic is an adapter that allows you to drill cabinet hinges on line boring machines. The adapter is simply mounted on the drill head.

This adapter is ideally suited for the Line Driller TT13LDM and TT13LDPN, TT21Plus, TT23EBM1 and TT23EBM2.

With the PROFI Drill-Matic from Tendotools, you can quickly and precisely drill all cabinet hinges of the Blum, Hettich, Salice, Mepla, Grass, Mini and Maxi brands.

What's important in this system is that the hinge drill (in the middle) is right-turning and the outer drills are left-turning.

The drill bits have to be ordered separately and are available in different diameters (3, 5 and 8 mm for the left-

turning drills, 26, 35 and 40 mm for the right-turning drills).

PRODUCT INFORMATION

- Adapter for the Line Driller line boring machines
- For all cabinet hinges of the Blum, Hettich, Salice, Mepla, Grass, Mini and Maxi brands
- Drill bits to be ordered separately
