GALERIJAFBEELDINGEN

This professional radial arm saw combines power, precision and versatility.

It is equipped with a safety switch and a ball bearing track with 8 ball bearings.

The saw is conveniently adjustable for cross-cutting, miter cutting, chamfers and double miter cuts.

The quiet and maintenance-free induction motor (230 V and 400 V) is braked.

Heavy-duty and professional execution of the column socket. The guide over the entire arm length (8 ball bearings) ensures extremely high precision and long life. The motor block ensures the automatic return of the saw.

The machine comes with a very solid and stable base with a durable table top. As a standard, a closed saw hood is provided for safety, and the laser pointer allows you to work clearly. It has easy controls and clear graduations for setting the width, depth and cutting angle.

PRODUCT INFORMATION

- Braked 230 V (2,5 HP) or 400 V (5,5 HP) induction motor
 - Laser pointer
 - Safety switch
- Guide over the entire arm length (8 ball bearings)
 - Clear indication in any position
- Clear graduations for setting the width, depth and cutting angle
 - Group can be rotated 180°

- Tiltable head with quick-click system
 - Width of rip 1100 mm
- Capacity at 90°: depth 120 mm, length 900 mm
- Capacity at 45°: depth 80 mm, length 600 mm
