

CURVED ABRASIVE PLANER CE123N

€474,96 (excl. VAT)

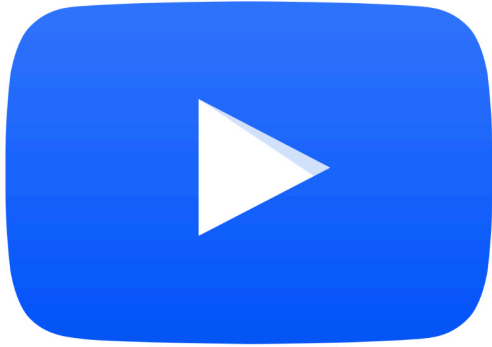

This abrasive planer from Virutex is easy to use and delivers fast & efficient results on large, round surfaces. The machine has excellent results on any surface coated with paint, resin, varnish or laminated panels. Easy to use on different surfaces such as wood (also against the grain) or sandwich panels. A sanding sleeve with sanding roller grain 50 is fitted as standard. Sanding rolls with other grit sizes are available on request. No additional tools are required to replace the sanding rollers.

Particularly useful for working in shipyards, where fibreglass, carbon fibre and kevlar resins are used. Also for stripping gelcoat and paint layers. Because of its round sanding surface, this machine is indispensable in the manufacture of curved wooden parts such as stairs, etc.

Supplied as standard in a handy PVC case.
