

ROUTER FOR FITTING HINGES FR129VB

€829,74 - €845,81 (excl. VAT)

Special router for door hinges and all kinds of hardware for door frames and doors. The machine fits easily on doors without measuring and without leaving traces. The vice for this attachment has a maximum width of 200mm or 250mm. Both models are available. Easily fit three or four hinges per door, for both left and right opening. Double depth stopper to mill both depths of invisible or concealed hinges in one movement, without having to change the mould. The machine is also still suitable for milling any traditional hinge. Standard delivery in a handy PVC carrying case.

Attention: In order to obtain a precise result, both for invisible and classic hinges, it is heavily advised to use a template. Templates for the most common, classic hinges (such as Argenta 80/80) or invisible hinges (such as Argenta Invisible Medium or Argenta Invisible Neo) are always available. Do you not use Argenta hinges? Or would you like to mill locks or lock plates? Contact us and we will create a custom template for you.

GALERIJAFBEELDINGEN

Special router for door hinges and all kinds of hardware for door frames and doors. The machine fits easily on doors without measuring and without leaving traces. The vice for this attachment has a maximum width of 200mm or 250mm. Both models are available. Easily fit three or four hinges per door, for both left and right opening. Double depth stopper to mill both depths of invisible or concealed hinges in one movement, without having to change the mould. The machine is also still suitable for milling any traditional hinge.

New and easy to adjust clamping system that perfectly clamps the cutter to the door frame without damaging the surface. Placing the mould can also be done quickly, it only has to be clicked into the guide and is immediately ready for use. The machine is equipped with a powerful motor (1000W) with electronic speed regulation and control. Thanks to this control system, the speed remains constant, even under load.
