ROUTER/TRIMMER FP114

€153,76 (excl. VAT)

Specially designed for cutting holes for door hinges without using an additional template. It is equipped with a millimetric knob that allows easy adjustment. It can also be used for trimming edges and making slots in wood or plastic. It is also possible to cut mortises with templates, using special base with copier, included in standard equipment. Suitable for working with composite panels (Alucobond® and similar) using routing and folding method (optional 90° and 135° bits).

SKU: VIR-FP114
