

SET (12) SCROLL SAW BLADE CARBON STEEL 127MM (18,5 TPI) - WITH PIN - SKIP TOOTH

€8,26 (excl. VAT)

Scroll saw blade with pin with length 127mm and fine teeth (18.5 TPI) with SKIP tooth for better chip removal. This scroll saw blade in hardened steel "Flexback" is extremely suitable for wood, horn or bone. The teeth of the saw blade were given an additional heat treatment for increased hardness. This keeps the band very supple and increases your cutting comfort thanks to the hardness of the teeth. Available per set of 12 saw ribbons. Extremely suitable for use on our scroll saws TT406E or TT456E.
