

BARVEX MAGNETIC PLANER BLADE SET, PBSET

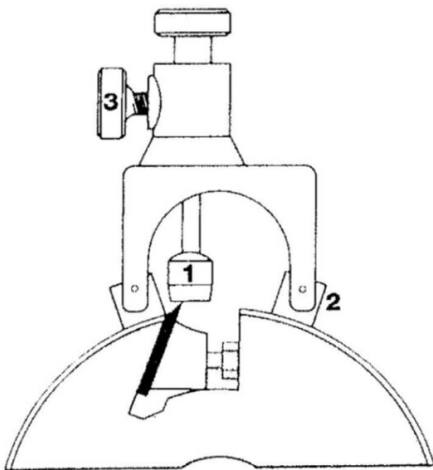

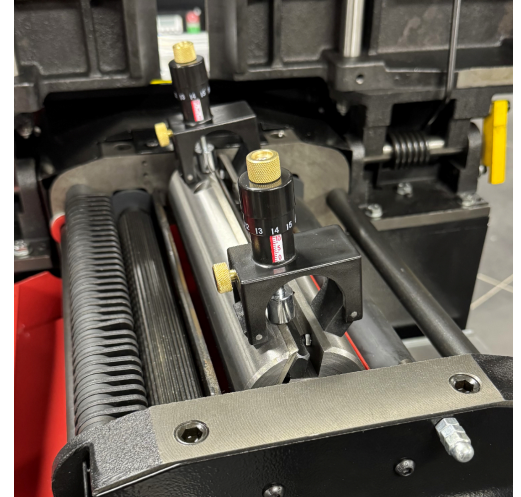

€61,98 (excl. VAT)

With the BARVEX magnetic adjustment jig you can adjust your planer blades or planing chisels easily, quickly and extremely accurately. Thanks to the powerful magnets, the adjustment jig adheres firmly to the metal planing spindle. This allows you to effortlessly position the planer blades at the correct height. After setting the zero position, use the brass knobs to accurately adjust the planing chisels at both ends to the desired height. The height indicator helps you to read perfectly when the blades are positioned correctly. When the blades are properly adjusted on both ends, you can secure them and easily remove the jig. The BARVEX adjustment jig comes standard in a wooden case, so you can safely store and transport the tool.

PBSET: for precision and convenience when adjusting your planer blades!
