

ELECTRIC SHAPE PLANER FR98H

€783,98 (excl. VAT)

This Virutex electric hand planer is designed to profile or bevel beams, posts or other wooden work pieces. On delivery there are a pair of straight knives mounted on this machine, suitable for chamfering edges. A profile knife (ref. 9841006) is also included as standard with this planer. A number of other profile knives are optionally available. The width of your profiles is adjustable between 0mm and 40mm.

SKU: VIR-FR98H

GALERIJAFBEELDINGEN

This Virutex electric hand planer is designed to profile or bevel beams, posts or other wooden work pieces. On delivery there are a pair of straight knives mounted on this machine, suitable for chamfering edges. A profile knife (ref. 9841006) is also included as standard with this planer. A number of other profile knives are optionally available. Because the guide on which your workpiece rests moves in relation to the machine, you can still create different profiles with the same knife. The width of your profiles is adjustable between 0mm and 40mm.

Thanks to the two handles, you always work comfortably and can safely hold the planer in any position. Using the button at the top, it is possible to adjust the second handle to different positions while working on horizontal surfaces. In this way, the safe and comfortable grip is always guaranteed. The planer FR98H is equipped with an electronic start system with safety switch. Supplied as standard with connector for dust extraction.

PRODUCT INFORMATION

- Hand planer for profiles
- A pair of straight & profile knives included
